

Hurricane Haze 1D

Hurricane Haze 1D creates a light water-based haze to enhance any light show. Easily set the DMX address and standalone operation using the digital display. The haze output and blower speed can be adjusted in stand-alone mode using the digital display with no controller required. Output can also be adjusted using the included FC-T wired timer remote and DMX. A built-in sensor helps prolong the hazer's life by stopping the pump automatically when the fluid level is low.
