

ShowXpress

ShowXpress is a software program that turns almost any computer into a lighting console. The program, which is free and is updated regularly, can be downloaded to a computer supported by Windows® XP, Vista and Windows 7 as well as Mac OSX. ShowXpress allows the user to create, store and play back scenes with any DMX lighting fixture. The software communicates with the lights via a required DMX 512 interface available from CHAUVET with options ranging from beginner to expert. For the latest updates and releases, visit our [ShowXpress Download's](#) page.

Highlights

- Control Board
 - Works on Windows® and Mac OS X
 - Main window where all other screens are accessed
 - Controls up to 6 universes (3,072 DMX channels)
- Setup
 - Create new fixture profiles or select from internal library
