

Vue 1.1

The VUE is a groundbreaking line of highly portable, DMX-controllable LED-fitted beam effects. The Vue 1.1 is an update to the original Vue I and features a compact and functional case with adjustable bracket.

Highlights

- Compact and lightweight LED moonflower effect light
- Enhance light shows with blackout, static and strobe effects
- Create customized looks with individual control of red, green and blue LEDs
- Access built-in automated and sound-activated programs in master/slave or DMX mode
- Create coordinated light shows by linking with other Vue I, Vue II, Vue VI, Vue 6.1 fixtures in master/slave mode
- Increase mounting options with the adjustable hanging bracket, complete with slide rail
- Fits best in the CHS-40 VIP Gear Bag
