1. BEFORE YOU BEGIN

What Is Included

- 4BAR™ Flex
- Power Cord
- Carrying Case
- 2 L-brackets
- Footswitch
- Warranty Card
- Quick Reference Guide

Unpacking Instructions

Immediately upon receipt, carefully unpack the product and check the box to make sure you have received all the parts indicated above in good condition.

Claims

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, upon receipt notify the carrier immediately, not CHAUVET®. Failure to do so in a timely manner may invalidate your claim with the carrier. In addition, keep the box and all the contents for inspection.

For other issues such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with CHAUVET® within 7 days of receiving the merchandise.

Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
Menu > Settings	A sequence of menu options to be followed
<ENTER>	A key to be pressed on the product's control panel
ON	A value to be entered or selected

Symbols

Symbol	Meaning
	This paragraph contains critical installation, configuration, or operation information. Failure to comply with this information may render the product partially or completely inoperative, cause damage to the product, or cause harm to the user.
	This paragraph contains important installation or configuration information. Failure to comply with this information may prevent the product from functioning correctly.
	Useful information.

Document Information

The information and specifications contained in this document are subject to change without notice. CHAUVET® assumes no responsibility or liability for any errors or omissions that may appear in this manual. CHAUVET® reserves the right to update the existing document or to create a new document to correct any errors or omissions.

You can download the latest version of this manual from www.chauvetlighting.com.

Safety Notes

Please read the following Safety Notes carefully before working with the product. The Notes include important safety information about installation, usage, and maintenance.

- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Avoid direct eye exposure to the light source while the product is on.
- Make sure the power cord is not crimped or damaged.
- Never disconnect the product from power by pulling or tugging on the cord.
- If mounting the product overhead, always secure to a fastening device using a safety cable.
- Make sure there are no flammable materials close to the product when operating.
- Do not touch the product's housing when operating because it may be very hot.

- Always make sure that the voltage of the outlet to which you are connecting the product is within the range stated on the decal or rear panel of the product.
- The product is for indoor use only! (IP20) To prevent risk of fire or shock, do not expose the product to rain or moisture.
- Always install the product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Be sure that no ventilation slots on the product's housing are blocked.
- Never connect the product to a dimmer.
- Make sure to replace the fuse with another of the same type and rating.
- Never carry the product from the power cord or any moving part. Always use the hanging/mounting bracket.
- The maximum ambient temperature (Ta) is 104° F (40° C). Do not operate the product at higher temperatures.
- In the event of a serious operating problem, stop using the product immediately.
- Never try to repair the product. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center.

- Keep this User Manual for future use. If you sell the product to another user, be sure that they also receive this document.

2. INTRODUCTION

Product Overview

Product Dimensions

3. SETUP

AC Power The 4BAR™ Flex has an auto-ranging power supply and it can work with an input voltage range of 100~240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's [Technical Specifications](#). The listed current rating indicates the product's average current draw under normal conditions.

Always connect the product to a protected circuit (circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

Fuse Replacement (Power Linking)

Follow the instructions below to change the power linking fuse, if necessary.

Disconnect the product from the power outlet before replacing the fuse.

1. Disconnect the product from power.
2. With a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse.
4. Replace with a fuse of the exact same type and rating.
5. Screw the fuse holder cap back in place and reconnect power.

Always replace a blown fuse with another of the same type and rating.

Fuse Replacement (Power In)

Follow the instructions below to change the power-in fuse, if necessary

Disconnect the product from the power outlet before replacing the fuse.

1. Disconnect the product from power.
2. Wedge the tip of a flat-head screwdriver into the slot of the fuse holder.
3. Pry the fuse holder out of the housing.
4. Remove the blown fuse from the holder.
5. Replace with a fuse of the exact same type and rating.
6. Insert the fuse holder back in place and reconnect power.

A spare fuse is not included; however, the safety cap has room for a spare.

Power Linking The product provides power linking via the IEC outlet located in the back of the unit. Please see the diagram below for further explanation.

Power Linking
Diagram

You can power link up to 12 4BAR™ Flex units on 120 VAC or up to 21 4BAR™ Flex units on 230 VAC.

The power linking diagram shown above corresponds to the North American version of the product **ONLY!** If using the product in other markets, you must consult with the local CHAUVET® distributor as power linking connectors and requirements may differ in your country or region.

Mounting Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#).

Orientation The 4BAR™ Flex may be mounted in any position; however, make sure adequate ventilation is provided around the product.

- Rigging**
- Before deciding on a location for the product, always make sure there is easy access to the product for maintenance and programming purposes.
 - Make sure that the structure onto which you are mounting the product can support the product's weight. Please see the [Technical Specifications](#) for weight information.
 - When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
 - When rigging the product onto a truss, you should use a mounting clamp of appropriate weight capacity.
 - When power linking multiple products, you must always consider the length of the power linking cable and mount the products close enough for the cable to reach.
 - The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

4. OPERATION

Control Panel Operation

To access the control panel functions, use the four buttons located underneath the display. See the [Product Overview](#) to see the button locations on the control panel.

Button	Function
<MENU>	Press to find an operation mode or to back out of the current menu option
<UP>	Press to scroll up the list of options or to find a higher value
<DOWN>	Press to scroll down the list of options or to find a lower value

Menu Map

Mode	Programming Steps		Description
DMX Personalities	3-CH	d 1-d512	Selects DMX personality and starting address
	15CH		
Sound-Active Mode	SND		Sets Sound-Active mode
Automatic Mode	AUTO		Sets Auto Program
Auto Program Speed	S--	S 1–S100	Sets Auto Program speed

Configuration (DMX)

Set the product in DMX mode to control with a DMX controller.

1. Connect the product to a suitable power outlet.
2. Turn the product on.
3. Connect a DMX cable from the DMX output of the DMX controller to the DMX input on the product.

DMX Personalities and Starting Address

The 4BAR™ Flex has two DMX personalities. One is a 3-channel mode and the other is a 15-channel mode.

The 4BAR™ Flex uses up to 15 DMX channels in its highest DMX mode, which defines the highest configurable address to **498**.

When selecting a starting DMX address, always consider the number of DMX channels the selected DMX mode uses. If the starting address is too high, access to some of the product's channels will be restricted.

If you are not familiar with the DMX protocol, download the DMX Primer from www.chauvetlighting.com.

To choose your starting address:

1. Press <MENU> repeatedly until **3-CH** (3-channel mode) or **15CH** (15-channel mode) shows on the display.
2. Use <UP> or <DOWN> to select the starting address.

DMX Channel Assignments and Values

15-CH	Channel	Function	Value	Setting
	1	Control/Operating Mode	000 ○ 009	RGB Color Mixing Mode
			010 ○ 029	Auto Program 1
			030 ○ 049	Auto Program 2
			050 ○ 069	Auto Program 3
			070 ○ 089	Auto Program 4
			090 ○ 109	Auto Program 5
			110 ○ 129	Auto Program 6
			130 ○ 149	Auto Program 7
			150 ○ 169	Auto Program 8
			170 ○ 189	Auto Program 9
			190 ○ 209	Auto Program 10
			210 ○ 229	Auto Program 11
			230 ○ 249	Auto Program 12
			250 ○ 255	Sound-Active Mode
	2	Dimmer	000 ○ 008	No function
			009 ○ 255	Dimmer 1–100%
	3	Strobe	000 ○ 255	0–100%
	4	Red	000 ○ 255	0–100%
	5	Green	000 ○ 255	0–100%
	6	Blue	000 ○ 255	0–100%
	7	Red	000 ○ 255	0–100%
	8	Green	000 ○ 255	0–100%
	9	Blue	000 ○ 255	0–100%
	10	Red	000 ○ 255	0–100%
	11	Green	000 ○ 255	0–100%
	12	Blue	000 ○ 255	0–100%
	13	Red	000 ○ 255	0–100%
	14	Green	000 ○ 255	0–100%
	15	Blue	000 ○ 255	0–100%
3-CH	Channel	Function	Value	Setting
	1	Red	000 ○ 255	0–100%
	2	Green	000 ○ 255	0–100%
	3	Blue	000 ○ 255	0–100%

Configuration (Standalone)

Set the product in one of the standalone modes to control without a DMX controller.

1. Connect the product to a suitable power outlet.
2. Turn the product on.

Never connect a product that is operating in any standalone mode (either Automatic or Sound) to a DMX string connected to a DMX controller. Products in standalone mode may transmit DMX signals that could interfere with the DMX signals from the controller.

Sound-Active Mode

To enable the Sound-Active mode, do the following:

1. Press **<MENU>** repeatedly until **SND** shows on the display.
2. Turn the music on and adjust the microphone sensitivity knob until the product starts responding to the beat of the music.

The product will only respond to low frequencies of music (bass and drums).

Automatic Mode

To enable the Automatic mode, follow the instructions below:

1. Press **<MENU>** repeatedly until **AUTO** shows on the display.
2. Press **<MENU>** and **S 1–S100** shows on the display.
3. Use **<UP>** or **<DOWN>** to adjust the duration of each step of the automatic program from **S 1** (fast) to **S100** (slow).

Master/Slave Mode

The Master/Slave mode allows a single 4BAR™ Flex unit (the “master”) to control the actions of one or more 4BAR™ Flex units (the “slaves”) without the need of a DMX controller. The master unit will be set to operate in either Automatic or Sound Active mode, while the slave units will be set to operate in Slave mode. Once set and connected, the slave units will operate in unison with the master unit.

Configure the units as indicated below.

Slave units:

1. Press **<MENU>** repeatedly until **3-CH** or **15CH** shows on the display.
2. Use **<UP>** or **<DOWN>** to set the DMX address to **d 1**.

Note: The DMX address can be set from either the 3-channel or the 15-channel DMX personality.

3. Connect the DMX input of the first slave unit to the DMX output of the master unit.
4. Connect the DMX input of the subsequent slave units to the DMX output of the previous slave unit.
5. Finish setting and connecting all the slave units.

Master unit:

1. Set the master unit to operate in either Automatic or Sound-Active mode.
2. Make the master unit the first unit in the DMX daisy chain.

• **Configure all the slave units before connecting the master unit to the DMX daisy chain.**

• **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master unit.**

• **Do not connect more than 31 slave units to the master unit.**

Footswitch Operation

The included footswitch provides quick access to the preset colors, color change programs, and triggering via the onboard microphone on the 4BAR™ Flex:

1. Power on the fixture.
2. Connect the footswitch to the 4BAR™ Flex via the 4-pin connection cable with plug.
3. Press pedal #1 (Preset) to activate control. When this is operating properly, the LEDs on the 4BAR™ Flex will light white (first function on pedal #1).

Pedal	Sub-option	Function
1 (Preset)	1 x press	White
	2 x press	Red
	3 x press	Green
	4 x press	Blue
	5 x press	Yellow
	6 x press	Magenta
	7 x press	Cyan
	8 x press	Color change every second in a continuous loop
	9 x press	Color change every three seconds in a continuous loop
2 (Sound On)	1 x press	Sound controlled
3 (Blackout)	1 x press	All LEDs off (blackout)

There is no need to modify any settings for the 4BAR™ Flex before connecting the footswitch. It will operate properly in any mode.

Plug the master fixture in LAST!

Disconnecting the Footswitch

In order to properly disconnect the footswitch, please follow these steps:

1. Unplug the footswitch from the 4BAR™ Flex.
2. Turn the power to the fixture off (unplug the power cable).
3. Turn the power to the fixture on again (plug in the power cable), and the fixture will properly operate on any one of the three modes.

5. TECHNICAL INFORMATION

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and mechanical wear. To maintain optimum performance and minimize wear, you should clean your lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increasing the cleaning frequency.

To clean the product, follow the instructions below:

- Unplug the product from power.
- Wait until the product is at room temperature.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
- Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
- Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
- Softly wipe any dirt or grime to the outside edge of the transparent surface.
- Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

To return a product or request support:

- In the U.S., contact CHAUVET® World Headquarters (see below).
- In the UK or Ireland, contact CHAUVET® Europe Ltd. (see below).
- In any other country, DO NOT contact CHAUVET®. Contact your distributor. See www.chauvetlighting.com for distributors outside the U.S., United Kingdom, or Ireland.

If you live outside the U.S., United Kingdom, or Ireland, contact your distributor of record and follow their instructions on how to return CHAUVET® products to them. Visit our website for contact details.

Returns

Call the corresponding CHAUVET® Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

You must send the merchandise prepaid, in its original box, and with its original packing and accessories. CHAUVET® will not issue call tags.

Clearly label the package with the RMA number. CHAUVET® will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- The RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

CHAUVET® reserves the right to use its own discretion to repair or replace returned product(s).
