Unpacking Instructions
Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

Claims
If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1—512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
Menu > Settings	A sequence of menu options to be followed
<ENTER>	A key to be pressed on the product's control panel
ON	A value to be entered or selected

Symbols

Safety Notes

Please read the following Safety Notes carefully before working with the product. The Notes include important safety information about installation, usage, and maintenance.

- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Avoid direct eye exposure to the light source while the product is on.
- Make sure the power cord is not crimped or damaged.
- Never disconnect the product from power cord by pulling or tugging on the cord.
- If mounting the product overhead, always secure to a fastening device using a safety cable.
- Make sure there are no flammable materials close to the product when operating.
- Do not touch the product's housing when operating because it may be very hot.

- The product is not intended for permanent installation.
- Always make sure that the voltage of the outlet to which you are connecting the product is within the range stated on the decal or rear panel of the product.
- The product is for indoor use only! (IP20) To prevent risk of fire or shock, do not expose the product to rain or moisture.
- Always install the product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Be sure that no ventilation slots on the product's housing are blocked.
- Never connect the product to a dimmer.
- Make sure to replace the fuse with another of the same type and rating.
- Never carry the product from the power cord or any moving part. Always use the hanging/mounting bracket.
- The maximum ambient temperature (Ta) is 104 °F (40 °C). Do not operate the product at higher temperatures.
- In the event of a serious operating problem, stop using the product immediately.
- Never try to repair the product. Repairs carried out by unskilled people can lead to damage or malfunction. Please contact the nearest authorized technical assistance center.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Keep this User Manual for future use. If you sell the product to someone else, be sure that they also receive this document.

3. SETUP

AC Power

The COLORstrip/COLORstrip Mini has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

Fuse Replacement

1. Wedge the tip of a flat-head screwdriver into the slot of the fuse holder.
2. Pry the fuse holder out of the housing.
3. Remove the blown fuse from the holder and replace with a fuse of the exact same type and rating.
4. Insert the fuse holder back in place and reconnect power.

Installed fuse (held by plastic clip)

Safety cap

Spare fuse holder (inside safety cap)
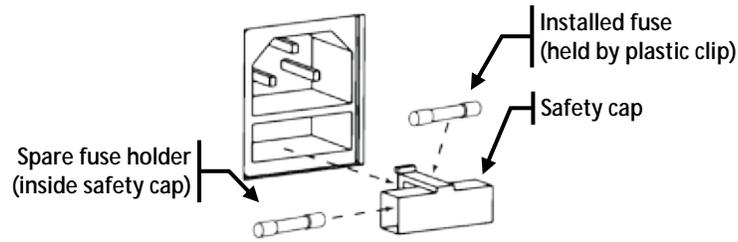

Disconnect the product from the power outlet before replacing the fuse.

Power Linking

The product provides power linking via the Edison outlet located in the back of the product. Please see the diagram below for further explanation.

1st Product

Power Linking Diagram

2nd Product

3rd Product

Additional Products
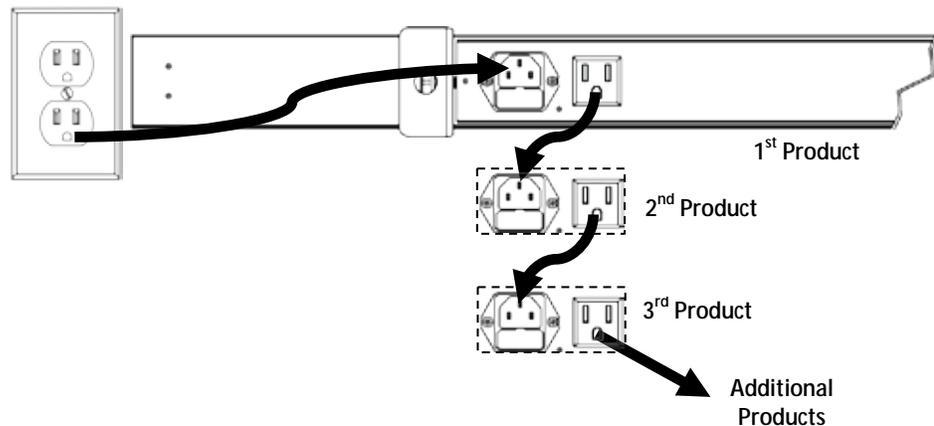

- **You can power link up to 15 COLORstrip products on 120 VAC or up to 28 COLORstrip products on 230 VAC.**
- **You can power link up to 20 COLORstrip Mini products on 120 VAC or up to 38 COLORstrip Mini products on 230 VAC.**

The power linking diagram corresponds to the North American version of the product ONLY! If using the product in other markets, consult with the local Chauvet distributor as power linking connectors and requirements may differ in your country or region.

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the <u>Safety Notes</u>.

Orientation

The COLORstrip/COLORstrip Mini may be mounted in any position; however, make sure adequate ventilation is provided around the product.

Rigging

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the <u>Technical Specifications</u> for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

DMX Linking The COLORstrip/COLORstrip Mini works with a DMX controller. Information about DMX is in the CHAUVET DMX Primer, which is available from the Chauvet website http://www.chauvetlighting.com/downloads/DMX_Primer_rev05_WO.pdf.

Configuration (DMX) Set the product in DMX mode to control with a DMX controller.
1. Connect the product to a suitable power outlet.
2. Connect a DMX cable from the DMX output of the DMX controller to the DMX input socket on the product.

Starting Address When selecting a starting DMX address, always consider the number of DMX channels the selected DMX mode uses. If you choose a starting address that is too high, you could restrict the access to some of the product's channels.

The COLORstrip/COLORstrip Mini uses 4 DMX channels, and the highest configurable address is **509**.

If you are not familiar with the DMX protocol, download the DMX Primer from www.chauvetlighting.com.

To select the starting address, do the following:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Press **<UP>** or **<DOWN>** repeatedly until **SYS** shows on the display.
3. Press **<ENTER>**.
4. Press **<UP>** or **<DOWN>** repeatedly until **SdAd** show on the display.
5. Press **<ENTER>** and **001–508** will show on the display.
6. Use **<UP>** or **<DOWN>** to select the starting address.
7. Press **<ENTER>**.

4	**Blue** (when Ch. 1 is 210–119)	000 ⚫ 255	0~100%

Configuration (Standalone)

Set the product in one of the standalone modes to control without a DMX controller.

Connect the product to a suitable power outlet.

Never connect a product that is operating in any standalone mode to a DMX string connected to a DMX controller. Products in standalone mode may transmit DMX signals that could interfere with the DMX signals from the controller.

Static Color

To run the COLORstrip/COLORstrip Mini on a static color, follow the instructions below:

1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Use **<UP>** or **<DOWN>** to select **ACt**.
3. Press **<ENTER>**.
4. Use **<UP>** or **<DOWN>** to scroll through the menu until **A001–A007** shows on the display.
5. Press **<ENTER>** and **F _ _ _** will show on the display.
6. Use **<UP>** or **<DOWN>** to increase or decrease the strobe value.
   - Set **F000** for no strobe.
   - Set **F001–F099** for auto strobe, from slow to fast.
   - Set **F100** for sound-active strobe (Sensitivity knob must be turned up).
7. Press **<ENTER>**.

Automatic and Sound-Active Mode

To run a color chase, do the following:

1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Use **<UP>** or **<DOWN>** to select **ACt**.
3. Press **<ENTER>**.
4. Use **<UP>** or **<DOWN>** to scroll through the menu until **A008–A020** or **A022–A023** shows on the display.
5. Press **<ENTER>** and **P _ _ _** will show on the display.
6. Use **<UP>** or **<DOWN>** to increase or decrease the program speed.
   - For **A008–A020**, set **P001–P50** for auto mode, slow to fast.
     Set **P051–P100** for sound-enabled auto mode, slow to fast. (Sensitivity knob must be turned up)
   - **A22** has no sound mode. Set **P001–P100** for fading mode, slow to fast.
   - For **A23**, set **P001–P100** for auto mode, slow to fast. Sound mode is always enabled. Set **P000** for sound mode only.
7. Press **<ENTER>**. For **A008–A011**, **F _ _ _** will show on the display.
8. Use **<UP>** or **<DOWN>** to increase or decrease the strobe value.
   - Set **F000** for no strobe.
   - Set **F001–F099** for auto strobe, from slow to fast.
   - Set **F100** for sound-active strobe (Sensitivity knob must be turned up).
9. Press **<ENTER>**.

For Sound-Active mode, turn the Sensitivity knob up until the product responds to the beat of the music.

In Sound-Active modes, the product will only respond to low frequencies of music (bass and drums).

Custom Color To custom mix a color, follow the instructions below:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Use **<UP>** or **<DOWN>** to select **ACt**.
3. Press **<ENTER>**.
4. Use **<UP>** or **<DOWN>** to scroll through the menu until **A021** shows on the display.
5. Press **<ENTER>** and **r _ _ _** will show on the display.
6. Use **<UP>** or **<DOWN>** to increase or decrease the red value.
7. Press **<ENTER>** and **G _ _ _** will show on the display.
8. Use **<UP>** or **<DOWN>** to increase or decrease the green value.
9. Press **<ENTER>** and **b _ _ _** will show on the display.
10. Use **<UP>** or **<DOWN>** to increase or decrease the blue value.
11. Press **<ENTER>** and **F _ _ _** will show on the display.
12. Use **<UP>** or **<DOWN>** to increase or decrease the strobe value.
    · Set **F000** for no strobe.
    · Set **F001–F099** for auto strobe, from slow to fast.
    · Set **F100** for sound-active strobe (Sensitivity knob must be turned up).
13. Press **<ENTER>**. Repeat steps 4–12 as necessary.

Blackout To black out the COLORstrip/COLORstrip Mini, do the following:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Use **<UP>** or **<DOWN>** to select **ACt**.
3. Press **<ENTER>**.
4. Use **<UP>** or **<DOWN>** to scroll through the menu until **A000** shows on the display.
5. Press **<ENTER>**.

Reset To reset the COLORstrip/COLORstrip Mini, follow the instructions below:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Use **<UP>** or **<DOWN>** to select **SYS**.
3. Press **<ENTER>**.
4. Use **<UP>** or **<DOWN>** to select **AAAd**.
5. Press **<ENTER>**.

IRC-6 Infrared Remote Control

The COLORstrip/COLORstrip Mini is compatible with the IRC-6 infrared remote control from Chauvet. Make sure to point the IRC-6 directly at the receiver on the front of the product.

IRC-6 Operation

Static Color Mode

Static Color mode will enable the product to output a preset color.

To run Static Color mode:

Press **<0>** – **<9>** to choose between the different preset static colors.

Automatic/Sound-Active Mode

Automatic/Sound-Active mode will enable you to run the automatic programs on the product. The product will also respond to music if the sensitivity knob is set high enough.

To turn on Automatic/Sound-Active mode:

1. Press **<AUTO>** or **<SOUND>** on the IRC.
2. Press **<0>** – **<9>**, or **<FADE>** to choose between the different programs.

To change the auto program speed:

Press **<+>** or **<–>** to increase or decrease the auto program speed.

To turn off Automatic/Sound-Active mode and return to Static Color mode:

Press **<AUTO>** or **<SOUND>** on the IRC.

COLORstrip/COLORstrip Mini IRC-6 Buttons:

Static Color Mode	Auto/Sound Mode
<0> - **A007** (White)	**<0>** - **A008**
<1> - **A001** (Red)	**<1>** - **A009**
<2> - **A021** (Amber)	**<2>** - **A010**
<3> - **A004** (Yellow)	**<3>** - **A011**
<4> - **A002** (Green)	**<4>** - **A012**
<5> - **A006** (Cyan)	**<5>** - **A013**
<6> - **A003** (Blue)	**<6>** - **A014**
<7> - **A005** (Purple)	**<7>** - **A015**
<8> - **A021** (Pink)	**<8>** - **A017**
<9> - **A021** (Sunflower)	**<9>** - **A023**
<FADE> - No function	**<FADE>** - **A022** (no response to sound)

Manual Color Control

To manually control the RGB percentage:

1. Press **<MANUAL>** on the IRC.
2. Press **<R>** (red), **<G>** (green), or **<B>** (blue) to choose the color.
3. Press **<+>** or **<–>** to increase or decrease the percentage of each color.

Miscellaneous Operation

To adjust the strobe rate of the program:

1. Press **<STROBE>** on the IRC.
2. Press **<+>** or **<–>** to increase or decrease the strobe rate.
3. Press **<STROBE>** again to turn off the strobe.

To black out the lights:

Press **<BLACK OUT>** on the IRC.

This will turn off all the lights until the button is pressed again.

NOTE: The IRC will not respond to any inputs when Black Out is activated. If the remote does not respond when a button is pressed, try pressing **<BLACK OUT>**. You may have inadvertently activated Black Out.

Master/Slave Mode

The Master/Slave mode allows a single COLORstrip/COLORstrip Mini product (the "master") to control the actions of one or more COLORstrip/COLORstrip Mini products (the "slaves") without the need of a DMX controller. The master product will be set to operate in either Stand-Alone mode or with the IRC-6, while the slave products will be set to operate in Slave mode. Once set and connected, the slave products will operate in unison with the master product.

Configure the products as indicated below.

Slave products:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Press **<UP>** or **<DOWN>** repeatedly until **SYS** shows on the display.
3. Press **<ENTER>**.
4. Press **<UP>** or **<DOWN>** repeatedly until **SdAd** shows on the display.
5. Press **<ENTER>**, and **001–508** will show on the display.
6. Set the DMX address to **001**.
7. Connect the DMX input of the first slave product to the DMX output of the master product. **SLA** will show on the display.
8. Connect the DMX input of the subsequent slave products to the DMX output of the previous slave product.
9. Finish setting and connecting all the slave products.

Master product:
1. Set the master product to run in auto or sound mode.
2. Make the master product the first product in the DMX daisy chain.

- **Configure all the slave products before connecting the master to the daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master.**

Master/Slave Runway Effect

The Master/Slave Runway Effect mode allows a single COLORstrip/COLORstrip Mini product (the "master") to control the actions of one or more COLORstrip/COLORstrip Mini products (the "slaves") in a runway effect without the need of a DMX controller. The master product will be set to operate on specific programs in either Automatic or Sound-Active mode, while the slave products will be set to operate in Slave mode. Once set and connected, the program will run smoothly from product to product.

Configure the products as indicated below.

Slave products:
1. Press **<MODE>** repeatedly until **SYS** or **ACt** shows on the display.
2. Press **<UP>** or **<DOWN>** repeatedly until **SYS** shows on the display.
3. Press **<ENTER>**.
4. Press **<UP>** or **<DOWN>** repeatedly until **SdAd** shows on the display.
5. Press **<ENTER>**, and **001–508** will show on the display.
6. Set the DMX address to **001**.
7. Connect the DMX input of the subsequent slave products to the Master/Slave output of the previous slave product.
8. Finish setting and connecting all the slave products.

Master product:
1. Set the master product to run in auto or sound mode, **A014–A020**.
2. Connect the DMX input of the first slave product to the Master/Slave output of the master product. **SLA** will show on the displays of the slaves.

- **Configure all the slave products before connecting the master to the daisy chain.**
- **Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.**
- **Do not connect more than 31 slaves to the master.**

5. MAINTENANCE

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean your lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

(i) Always dry the transparent surfaces carefully after cleaning them.

6. TECHNICAL SPECIFICATIONS

Dimensions and Weight

	Length	Width	Height	Weight
COLORstrip	38 in (965 mm)	2.5 in (64 mm)	6 in (155 mm)	4.5 lb (2 kg)
COLORstrip Mini	19 in (482 mm)	2.1 in (52 mm)	6.1 in (155 mm)	3.3 lb (1.5 kg)

Note: Dimensions in inches rounded to the nearest decimal digit.

RETURNS

To get support or return a product:

- If you are located in the U.S., contact Chauvet World Headquarters.
- If you are located in the UK or Ireland, contact Chauvet Europe Ltd.
- If you are located in Mexico, contact Chauvet Mexico.
- If you are located in Benelux, contact Chauvet Europe BVBA.
- If you are located in any other country, DO NOT contact Chauvet. Instead, contact your local distributor. See www.chauvetlighting.com for distributors outside the U.S., UK, Ireland, Mexico, or Benelux.

If you are located outside the U.S., UK, Ireland, Mexico, or Benelux, contact your distributor of record and follow their instructions on how to return Chauvet products to them. Visit our website www.chauvetlighting.com for contact details.

Call the corresponding Chauvet Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

To submit a service request online, go to www.chauvetdj.com/service-request.

Send the merchandise prepaid, in its original box, and with its original packing and accessories. Chauvet will not issue call tags.

Clearly label the package with the RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
