1. BEFORE YOU BEGIN

What Is Included

- 4BAR™ Tri
- Carrying Case
- Power Cord
- Tripod
- Tripod Carrying Case
- Footswitch
- Hanging Bracket with Mounting Hardware
- Warranty Card
- Quick Reference Guide

Unpacking Instructions

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

Claims

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
Menu > Settings	A sequence of menu options to be followed
<ENTER>	A key to be pressed on the product's control panel
ON	A value to be entered or selected

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Safety Notes

These notes include important information about mounting, usage, and maintenance; read before using the product.

- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Avoid direct eye exposure to the light source while the product is on.
- Make sure the power cord is not crimped or damaged.
- Never disconnect the product from power by pulling or tugging on the cord.
- If mounting the product overhead, always secure to a fastening device using a safety cable.
- Make sure there are no flammable materials close to the product when operating.
- Do not touch the product's housing when operating because it may be very hot.

- Always make sure that the voltage of the outlet to which you are connecting the product is within the range stated on the decal or rear panel of the product.
- The product is for indoor use only! (IP20) To prevent risk of fire or shock, do not expose the product to rain or moisture.
- Always install the product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Be sure that no ventilation slots on the product's housing are blocked.
- Never connect the product to a dimmer.
- Make sure to replace the fuse with another of the same type and rating.
- Never carry the product from the power cord or any moving part. Always carry by the bar or carrying case.
- The maximum ambient temperature (Ta) is 104 °F (40 °C). Do not operate the product at higher temperatures.
- In the event of a serious operating problem, stop using the product immediately.
- Never try to repair the product. Repairs carried out by unskilled people can lead to damage or malfunction. Contact the nearest authorized technical assistance center.
- This product is not intended for permanent installation.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

- Keep this User Manual for future use. If you sell the product to another user, be sure to give this document to the next owner.

2. INTRODUCTION

Overview

Back Panel View

Front View

Dimensions

3. SETUP

AC Power The 4BAR™ Tri has an auto-ranging power supply and it can work with an input voltage range of 100~240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

Always connect the product to a protected circuit (circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0~100% switch.

Fuse Replacement

1. Disconnect the product from power.
2. Wedge the tip of a flat-head screwdriver into the slot of the fuse holder.
3. Pry the fuse holder out of the housing.
4. Remove the blown fuse from the holder.
5. Replace with a fuse of the exact same type and rating.
6. Insert the fuse holder back in place and reconnect power.

Disconnect the product from power before replacing the fuse.

A spare fuse is not included; however, the safety cap has room for a spare.

Power Linking The product provides power linking via the IEC outlet located in the back panel.

You can power link up to 8 4BAR™ Tri products on 120 VAC or up to 16 4BAR™ Tri products on 230 VAC.

The power linking diagram shown above corresponds to the North American version of the product ONLY! If using the product in other markets, you must consult with the local CHAUVET® distributor as power linking connectors and requirements may differ in your country or region.

Mounting Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes.

Orientation The 4BAR™ Tri may be mounted in any position; however, make sure adequate ventilation is provided around the product.

- Rigging**
- Before deciding on a location, always make sure there is easy access to the product for maintenance and programming.
 - Make sure that the structure or surface onto which you are mounting the product can support the product's weight (see the [Technical Specifications](#)).
 - When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, such as an elevated platform or a truss.
 - When rigging the product onto a truss, you should use mounting clamps of appropriate weight capacity.
 - The adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.
 - When mounting to the tripod, be sure the stand is tightened properly and leveled.

4. OPERATION

Control Panel Operation

To access the control panel functions, use the four buttons located underneath the display.

Button	Function
<MENU>	Selects an operation mode or to backs out of the current menu option
<UP>	Scrolls up the list of options or selects a higher value
<DOWN>	Scrolls down the list of options or selects a lower value
<ENTER>	Activates a menu option or a selected value

Menu Map

Mode	Programming Steps		Description
DMX Mode	3-CH	d 1–d512	Selects DMX operating mode and sets the DMX starting address
	15CH		
Sound-Active	SND		The internal program runs to the beat of the music
Preset Colors	C--	C 1–C 7	Selects one of the preset colors (red, green, blue, cyan, magenta, yellow, or white)
Automatic Programs	P--	P 1–P 6	Selects one of the built-in programs
Speed	S--	S 1–S100	Adjusts the speed of the automatic programs (fast to slow)
RGB Color Mixing	U--	r 0–r100 g 0–g100 b 0–b100	Adjust the red, green, and blue levels to create custom colors

DMX Configuration

Set the product in DMX mode to control with a DMX controller.

1. Connect the product to a suitable power outlet.
2. Turn the product on.
3. Connect a DMX cable from the DMX output of the DMX controller to the DMX input socket on the product.

DMX Mode and Starting Address

When selecting a starting DMX address, always consider the number of DMX channels the selected DMX mode uses. If you choose a starting address that is too high, you could restrict the access to some of the product's channels.

The 4BAR™ Tri uses up to 15 DMX channels in single DMX mode, which defines the highest configurable address to **498**.

If you are unfamiliar with DMX, download the DMX Primer from www.chauvetlighting.com.

To select the starting address, do the following:

1. Press <MENU> repeatedly until **3-CH** or **15CH** shows on the display.
2. Press <ENTER>.
3. Use <UP> or <DOWN> to choose a DMX address from **d 1–d512**.
4. Press <ENTER>.

DMX Channel Modes, Assignments, and Values

15CH	Channel	Function	Value	Setting
15CH	1	Control/Operating Mode	000 ó 009	RGB color-mixing mode
			010 ó 029	Automatic 1
			030 ó 049	Automatic 2
			050 ó 069	Automatic 3
			070 ó 089	Automatic 4
			090 ó 109	Automatic 5
			110 ó 129	Automatic 6
			130 ó 149	Automatic 7
			150 ó 169	Automatic 8
			170 ó 189	Automatic 9
			190 ó 209	Automatic 10
			210 ó 229	Automatic 11
			230 ó 249	Automatic 12
	250 ó 255	Sound-active		
	2	Dimmer	000 ó 009	No function
		010 ó 255	Dimmer 1–100%	
3	Strobe	000	No function	
		001 ó 255	Strobe (slow to fast)	
4	Red 1	000 ó 255	Red 1 (0–100%)	RGB Color Mixing Pod 1
5	Green 1	000 ó 255	Green 1 (0–100%)	
6	Blue 1	000 ó 255	Blue 1 (0–100%)	
7	Red 2	000 ó 255	Red 2 (0–100%)	RGB Color Mixing Pod 2
8	Green 2	000 ó 255	Green 2 (0–100%)	
9	Blue 2	000 ó 255	Blue 2 (0–100%)	
10	Red 3	000 ó 255	Red 3 (0–100%)	RGB Color Mixing Pod 3
11	Green 3	000 ó 255	Green 3 (0–100%)	
12	Blue 3	000 ó 255	Blue 3 (0–100%)	
13	Red 4	000 ó 255	Red 4 (0–100%)	RGB Color Mixing Pod 4
14	Green 4	000 ó 255	Green 4 (0–100%)	
15	Blue 4	000 ó 255	Blue 4 (0–100%)	
3-CH	Channel	Function	Value	Setting
	1	Red	000 ó 255	0–100%
	2	Green	000 ó 255	0–100%
	3	Blue	000 ó 255	0–100%

Standalone Configuration

Set the product in one of the standalone modes to control without a DMX controller.

- Connect the product to a suitable power outlet.

Never connect a product that is operating in any standalone mode (Sound-Active, Automatic, Master/Slave) to a DMX daisy chain connected to a DMX controller. Products in a standalone mode may transmit DMX signals that could interfere with the DMX signals from the controller.

Sound-Active Mode

To enable the Sound-Active mode, do the following:

1. Press **<MENU>** repeatedly until **SND** shows on the display.
2. Press **<ENTER>**.
3. Turn the music on and adjust the microphone sensitivity until the product begins to react to the sound of the music.
4. Press **<ENTER>**.

The product will only respond to low frequencies of music (bass and drums).

Automatic Mode

To enable the Automatic mode, follow the instructions below:

1. Press **<MENU>** repeatedly until **P 1-P 6** shows on the display.
2. Press **<ENTER>**.
3. Use **<UP>** or **<DOWN>** to adjust the auto program speed (**S 1-S100**).
4. Press **<ENTER>**.

Master/Slave Mode

The Master/Slave mode allows a single 4BAR™ Tri (the master) to control the actions of one or more 4BAR™ Tri products (the slaves) without the need of a DMX controller. The master will be set to operate in either Automatic or Sound-Active mode, while the slaves will be set to operate in Slave mode. Once set and connected, the slave units will operate in unison with the master unit. To configure the products, follow these steps:

Slave units

1. Press **<MENU>** repeatedly until **3-CH** or **15CH** shows on the display.
2. Press **<ENTER>**.
3. Use **<UP>** or **<DOWN>** to set the DMX address to **d 1**.
4. Press **<ENTER>**.
5. Connect the DMX input of the first slave to the DMX output of the master.
6. Connect the DMX input of the subsequent slaves to the DMX output of the previous slave.
7. Finish setting and connecting all the slaves.

Master unit

8. Set the master to operate in either Automatic or Sound-Active mode.
9. Make the master the first unit in the DMX daisy chain.

- **Configure all the slaves before connecting the master to the DMX daisy chain.**

Never connect a DMX controller to a DMX string configured for Master/Slave operation because the controller may interfere with the signals from the master.

- **Do not connect more than 31 slaves to the master.**

The 4BAR™ Tri is linkable with the 4BAR™.

Preset Colors To select one of the preset static colors, do the following:

1. Press **<MENU>** repeatedly until **C--** shows on the display.
2. Press **<ENTER>**.
3. Use **<UP>** or **<DOWN>** to select **C 1–C 7**.
 - **C 1** - red
 - **C 2** - green
 - **C 3** - blue
 - **C 4** - cyan
 - **C 5** - magenta
 - **C 6** - yellow
 - **C 7** - white
4. Press **<ENTER>**.

Automatic Programs To enable the Automatic programs, follow the instructions below:

1. Press **<MENU>** repeatedly until **P 1–P 6** shows on the display.
2. Press **<ENTER>**.
3. Use **<UP>** or **<DOWN>** to adjust the auto program speed (**S 1–S100**).
4. Press **<ENTER>**.

RGB Color Mixing To enable custom color mixing, do the following:

1. Press **<MENU>** repeatedly until **U--** shows on the display.
2. Press **<ENTER>** and **rxxx** (red), **gxxx** (green), or **bxxx** (blue) shows on the display.
3. Use **<UP>** or **<DOWN>** to select **x 0–x100** (0–100%) for the selected color.
4. Press **<ENTER>** to go to the next color.

Footswitch Operation

The included footswitch provides quick access to preset colors, color-change programs, and sound-activation through the 4BAR™ Tri microphone.

To use the footswitch:

1. Power the product on.
2. Connect the footswitch to the 4BAR™ Tri with the 4-pin connection cable with plug.
3. Press pedal #1 (Preset) to activate control. When working, all the LEDs will light white, which is the first function of pedal #1.
4. Use the chart below to activate the desired function.

To disconnect the footswitch:

1. Unplug the footswitch from the 4BAR™ Tri.
2. Unplug the power cable from the 4BAR™ Tri.
3. Power the 4BAR™ Tri again to operate without the footswitch.

Pedal	Sub-option	Function
1 Preset	1 x press	White
	2 x press	Red
	3 x press	Green
	4 x press	Blue
	5 x press	Yellow
	6 x press	Magenta
	7 x press	Cyan
	8 x press	Color change every second in a continuous loop
	9 x press	Color change every 3 seconds in a continuous loop
2 Sound	N/A	Sound-Active
3 Blackout	N/A	Immediately turns off all the LEDs

The 4BAR™ Tri footswitch will work properly in any mode. No settings needs to be modified before using the footswitch.

5. TECHNICAL INFORMATION

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and mechanical wear. To maintain optimum performance and minimize wear, clean the product at least twice a month. However, usage and environmental conditions contribute to increased cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface.
4. Clean all external optics and transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
6. Softly wipe any dirt or grime to the outside edges of the external optics or transparent surface.
7. Gently polish the external optics and transparent surfaces until they are free of haze and lint.

Always dry the external optics and transparent surfaces carefully after cleaning them.

To return a product or request support:

- In the U.S., contact Chauvet World Headquarters (see below).
- In the UK or Ireland, contact Chauvet Europe Ltd. (see below).
- In Mexico, contact Chauvet Mexico (see below).
- In any other country, DO NOT contact Chauvet. Contact your distributor. See www.chauvetlighting.com for distributors outside the U.S., United Kingdom, Ireland, or Mexico.

Outside the U.S., United Kingdom, Ireland, or Mexico, contact your distributor and follow their instructions on how to return CHAUVET® products to them. Visit our website for contact details.

Returns

Call the corresponding Chauvet Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

You must send the merchandise prepaid, in its original box, and with its original packing and accessories. Chauvet will not issue call tags.

Clearly label the package with the RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
